

MS880

Mammography Viewer

MS880

Mammography Viewer

Three years of films at once. The MS880A single-belt viewer is wide enough to present twelve 24 x 30 cm mammography films concurrently. Thus, the radiologist can comfortably view three years of film without ever changing belt frames.

At your fingertips. The control panel includes Next and Prior buttons to ensure the radiologist can efficiently screen films.

Accessories and Options. Auto Select, Belt Advance Foot Switch, Pivot or Fixed Instrument Mounting Arm, and Film Jacket File.
