

Looking for a whole new angle in cardiology?
Take this quiz and see for yourself.

SIEMENS
medical

Choose the chair on
the right that you think is
the most comfortable.

easy to relax

Recognizing the intrinsic value of patient comfort, we designed a revolutionary reclining chair that creates a whole new angle in cardiology.

The exclusive reclining chair allows your patients to sit back comfortably during scanning, with obvious benefits. A relaxed patient moves less, so image quality improves and diagnostic confidence increases.

- Inviting, open system
- Easy access for patients of any size or age
- Leather chair material comes in four versatile colors

easy to relax

Control the new cardiology
camera with a simple push
of a _____.

easy to use

An intuitive, icon-driven hand controller operates the new system, which is incredibly easy to learn and use.

Windows-based acquisition and processing stations, optimized for cardiology, perform all tasks with ease.

Based on *syngo*[®], the e.soft™ workstation is an expandable platform that provides a uniform working environment.

- Easy, automated camera set-up
- One-click acquisition and processing
- Fully automated imaging workflows

easy to use

The small, new system can be on site, installed and ready to operate in just 2 _____?

easy to install

You'll love how simple it is to site and install this system practically anywhere.

The 8 ft. by 8 ft. system footprint fits easily in most rooms without remodeling.

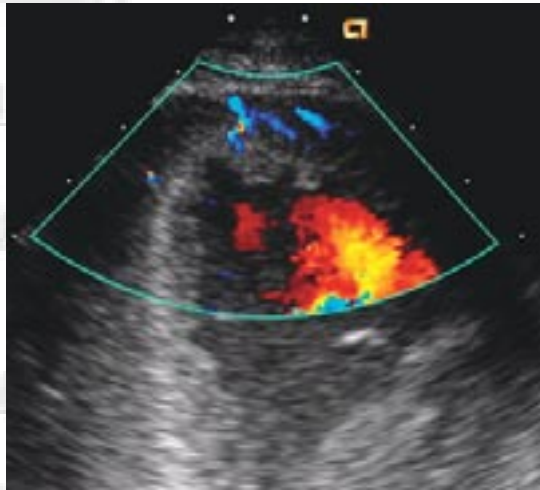

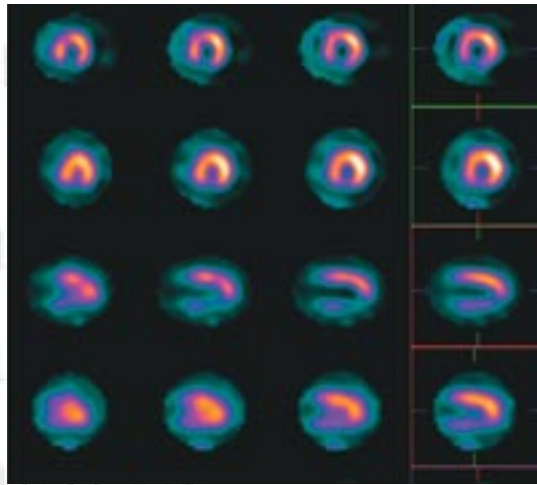

On-site application training will make your clinical transition quick and smooth.

- Typical installations completed within 2 days
- Site planning and start-up support available
- Easy integration into offices and clinical environments

easy to install

Which new diagnostic test
would you most like to add
to your practice?

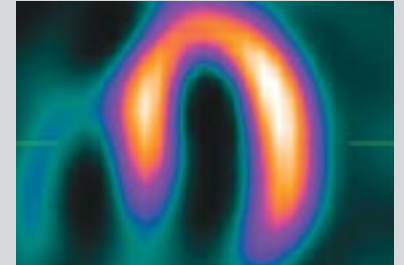

easy to add

Have you ever thought how nice it would be to have nuclear cardiology imaging services right in your own facility? – how much faster and more convenient it would be for everyone?

Now, adding your own in-house nuclear cardiology services is a lot easier than you might think.

Whether you're considering offering nuclear cardiology for the first time or expanding existing services, Siemens definitely gives you the best new angle in cardiology today.

- Myocardial viability and perfusion increase diagnostic confidence
- Fully integrated software to analyze ejection fraction and wall motion
- Provides results and reports faster, easier and more economically

easy to add

Choose the number of
daily patients needed to
break even with your own
cardiology camera.

easy to own

The new cardiology camera offers you an excellent low-cost, low-risk investment and revenue opportunity. The low break-even factor of only two patients per day promises an attractive return on investment.

Favorable lease conditions, warranties up to five years, and a whole range of Siemens Financial Services make this new cardiology camera extremely easy to own.

- Wide variety of financing options
- Support for start-up and referrals marketing.
- Flexible service contracts with guaranteed uptime
