CR 85-X Digitizer

CR 85-X is a multi-user digitizer featuring a unique drop-and-go buffer that eliminates waiting times and maximizes productivity.

CR 85-X is a multi-application digitizer, benefiting from three different image resolution modes.

Highest productivity

The cassette buffer eliminates waiting times and allows for a continuous workflow within the department. Zero-button operation with automated cassette handling makes CR 85-X a highly productive and user-friendly system with a throughput of up to 115 plates an hour, depending on size and application. Using CR 85-X as a central digitizer in the radiology department, multiple examination rooms can be supported.

No waiting

The CR 85-X digitizer requires no manual interaction and all the user has to do is to deposit the cassettes in the input buffer (up to 10 cassettes). The digitizer automatically takes cassettes from the input buffer and reads the demographic data from the memory on the cassette. It then scans the imaging plate, digitizes the image and returns the cassette to the output buffer for new exposures.

MAXIMIZING PRODUCTIVITY FOR THE COMPLETE RANGE OF CLINICAL APPLICATIONS

- No waiting times for improved patient care
- Input/output buffer for maximized productivity
- For a broad range of applications
- Three different image resolution modes (pixel pitch [µm] : 50 - 100 - 150)
Full data

CR 85-X reads imaging plates at a standard resolution of 6 pixels/mm. The high resolution mode of 10 pixels/mm is available for all image plate sizes. The maximum resolution mode of 20 pixels/mm is available for dedicated 18 x 24 cm and 24 x 30 cm extremities cassettes and plates.

Broad range of applications

In combination with the application-specific plates and cassettes, CR 85-X supports a broad range of applications:
- General radiography
- Orthopaedics – Extremities
- Dental
- Paediatrics

Compact footprint & optimal accessibility

CR 85-X occupies a very small floorspace and at the same time provides unhindered access to several users, both at the input and the output buffer, resulting in a smooth flow of operations. This concept makes CR 85-X the state-of-the-art solution for centralized CR environments.

CR user station

Its modular and ergonomic design includes:
- Cassette identification functions
- Space for:
  - Workstation for image handling, processing and dispatching
  - Monitor, network switches and UPS
  - Cassette storage.

An economical way to go digital

CR is compatible with all existing X-ray systems allowing X-ray departments to go digital without significant additional investments and workflow adaptations.

### General Specifications

**Cassette buffer capacity and performance**
- 10 cassettes of mixed sizes, both in input and output buffer
- Throughput: up to 112 plates/h (depending on size and application)

**LCD display**
- Machine status and error conditions

**Greyscale resolution**
- Data acquisition: 12 bits/pixel
- Output to processor: 12 bits/pixel

**Dimensions and weight**
- W x D x H: 84 x 115 x 142 cm (33 x 45 x 56 in)
- At foot: 84 cm (33 in)
- At buffer: 142 cm (56 in)
- Weight: Approx. 397 kg (875.2 lbs)

**Power**
- 50/60 Hz single phase
- 240V +10%, max. fuse 16A
- 230V ±10%, max. fuse 16A
- 208V ±10%, max. fuse 15A (e.g. USA)
- 200V ±10%, max. fuse 15A (e.g. Japan)

**Environmental conditions**
- Temperature: 20 - 30 °C (68 - 86°F)
- Humidity: 15 - 75% RH
- Magnetic fields: max. 12.60 µT
- Rate of change of temperature: 0.5°C/minute (0.9°F)

**Environmental effects**
- Noise level: max. 65 dB (A)

### Safety

**Approvals**
- TüV, UL, cUL, CE

**Transport details**
- Temperature: -25 to +55°C (-4 to 131°F),
  -25°C for max. 72 hours, +55°C for max. 96 hours
- Humidity: 5 - 95% RH
